

Automated S/MIME Certificate Issuance

Enterprise Administrators can opt-in to allow their organization to issue IV+OV S/MIME certificates without requiring users to upload identification documents or manually enter their personal details (e.g., given name, surname).

These details will be automatically retrieved from the Identity Provider (IdP) via SAML.

This feature is available only for users who log in via SAML and whose organizations release one of the following entitlements:

- urn:mace:terena.org:tcs:personal-user
- urn:mace:terena.org:tcs:smime-sv-autoissue

Automated S/MIME Certificate Issuance via SAML Entitlement

I, **Aristotle University of Thessaloniki**, acting as the authorized representative of Aristotle University of Thessaloniki within HARICA's CertManager certificate lifecycle management portal, hereby request the activation of automated S/MIME certificate issuance for validated individuals associated with my Organization. This applies to SAML-authenticated users designated by the Organization through the release of the:

- urn:mace:terena.org:tcs:personal-user
- or
- urn:mace:terena.org:tcs:smime-sv-autoissue

Furthermore, I confirm that my Organization collects and maintains appropriate evidence supporting the identity attributes of the individual Applicants specified above. These attributes, released by the Organization's Identity Provider (IdP), will be included in the certificates. My Organization is solely responsible for verifying the identity and accuracy of the information included in each certificate request and ensuring that all enrollment data is complete and correct.

Finally, by submitting this request, I declare that I have read and agree to HARICA's Terms of Use and Certificate Policy/Certification Practice Statement

Account Conversion to Academic Login

If you currently have a local account on our portal, you can **link it to your academic (SAML) account** via the Profile settings. This will allow you to take advantage of the new automated S/MIME feature.

Important:

To successfully convert your local account to an academic account, the **primary email address released by your IdP must exactly match** the email address of your local account.

For example:

-  Match: username@university.edu (local) and username@university.edu (IdP)
-  Mismatch: username@domain.com (local) and username@it.domain.com (IdP)

If the email addresses do not match, the conversion process will fail. We are actively working on a solution to support email mismatches in the near future. Until then, affected users will need to continue using their local accounts and will not be able to access the automated S/MIME issuance feature.
